*if equipped
Climate Control System*

The automatic climate control system can maintain your preferred interior temperature by selecting the proper mix of heated or cooled air and fan speed. Use the buttons on the dashboard to control both front and rear operation. Climate control is turned off during auto idle stop operation*.

■ Front Operation

- **SYNC button**: Set the passenger’s side and rear temperature to the same as the driver’s side.

- **Recirculation button**: 
  - Recirculation mode (indicator on): Recirculates air from the vehicle’s interior.
  - Fresh Air mode (indicator off): Maintains outside ventilation.

- **Driver’s side temperature control switch**

- **ON/OFF button**

- **AUTO button**: Press, then use the temperature control switch to set your preferred temperature.

- **MODE button**: Change airflow location.

- **Fan control buttons**

- **A/C button**

- **Passenger’s side temperature control switch**

- **Rear defogger/heated door mirrors button***

- **Windshield defroster button**

■ Rear Operation

- **REAR ON/OFF button**

- **RR SETTINGS button**: Adjust rear temperature.

- **REAR LOCK button**: Disable rear control.

*if equipped
You can also operate the rear climate control using the rear controls located on the back of the center console. Make sure the REAR LOCK button is not on in the front.

**Heated Windshield Button**

**Canadian models**

Press the heated windshield button to deice the windshield when the vehicle is on.

If the outside temperature goes below 4°C, the heated windshield automatically activates for 15 minutes.

**Heated Steering Wheel***

Press the button to heat the steering wheel when the vehicle is on. Press the button again to turn off heating.

*if equipped
