During Operation

If a vehicle is detected ahead of you when ACC is turned on, the system maintains, accelerates, or decelerates your vehicle’s set speed to keep the vehicle’s set following interval from the vehicle ahead.

If a vehicle detected ahead of you slows down abruptly, or if another vehicle cuts in front of you, a beep sounds and BRAKE appears on the multi-information display to alert you.

ACC has limited braking capability.
When your vehicle speed drops below 22 mph (35 km/h), ACC will automatically cancel and no longer will apply your vehicle’s brakes.
Always be prepared to apply the brake pedal when conditions require.

Canceling ACC

Press the CANCEL or MAIN button, or press the brake pedal. The ACC indicator goes off.
Certain conditions may cause ACC to cancel automatically. When this happens, the amber ACC indicator appears on the multi-information display (see page 24).
After cruise control has been canceled, you can still resume the prior set speed by pressing RES/+ when your vehicle speed is over 25 mph (40 km/h).

Improper use of ACC can lead to a crash.
Use ACC only when traveling on open highways in good weather.

LaneWatch™*

Check the passenger-side rear areas in the display when the right turn signal is activated.

Activating LaneWatch

Activate the right turn signal. The LaneWatch display appears. Check the display for blind spots, and visually confirm that it is safe to change lanes.
You can also press the LaneWatch button on the end of the turn signal switch to view a constant real-time display. Press it again to turn the display off.

Changing Settings

Customize the display and how and when the display appears.
1. From the Home screen, select Settings.
2. Select Camera.
3. Select LaneWatch.
4. Select an option and make the preferred changes.
5. Press BACK to exit the menu.

Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death.
Do not rely only on LaneWatch while driving. Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.

Important Safety Reminder

Like all assistance systems, LaneWatch has limitations. Over-reliance on the system may result in a collision.
