Intelligent Traction Management System*  
Adjusts vehicle handling performance while driving on various road surfaces.

Press the Mode button to select one of four appropriate modes. The mode you select appears on the MID.

**Normal:** Provides balanced driving performance on most road surfaces.

**Snow:** Use when driving on snowy road surfaces.

**Mud***: Use when driving on muddy roads or off-road surfaces.

**Sand***: Use when driving on soft, sandy road or off-road surfaces.

Cruise control/adaptive cruise control* is not available when Snow, Mud, or Sand is selected.

---

**Eco Assist System**

Can help improve your fuel economy by adjusting the performance of the engine, climate control system, and cruise control.

**ECON Button**

Press the ECON button to turn the system on or off. The ECON Mode indicator appears when the system is turned on.

---

**Ambient Meter**

Color-coded bars around the speedometer change based on your driving style and brake or accelerator pedal operation.

**Green:** Fuel efficient driving

**Light green:** Moderate acceleration/deceleration

**White:** Aggressive acceleration/deceleration

---

**Vehicle Stability Assist (VSA®), aka Electronic Stability Control (ESC) System**

Helps to stabilize the vehicle during cornering if the vehicle turns more or less than what was intended. It assists in maintaining traction on slippery surfaces by regulating engine output and selectively applying the brakes.

**Turning VSA On or Off**

VSA is turned on every time you start the engine, even if you previously turned it off. If you turn VSA off, your vehicle has normal braking and cornering ability, but traction and stability enhancement become less effective.

Press and hold the VSA OFF button until you hear a beep to turn VSA on or off. The VSA OFF indicator appears when the system is off.

Traction control stops functioning, which may make it easier when trying to free your vehicle if it is stuck in mud or snow.
