Remote Engine Start*
Start your vehicle’s engine using the remote transmitter before you enter the vehicle.

Make sure the vehicle is in a safe location when using remote engine start (i.e., a well ventilated area, away from any flammable materials).

Starting the Engine
Press the Lock button, then press and hold the Engine button to remotely start the engine.

The engine runs for up to 10 minutes. To extend the run time for another 10 minutes, repeat the procedure during the initial 10 minutes.

While the engine is running, the climate control system adjusts the cabin temperature, the security system remains on, and lights and accessories remain off.

Stopping the Engine
Press and hold the Engine button.

The engine will also stop if it has been running for more than 10 minutes, or if any door is opened without using the remote or smart entry.

WARNING
Engine exhaust contains toxic carbon monoxide gas. Breathing carbon monoxide can kill you or cause unconsciousness. Never use the remote engine starter when the vehicle is parked in a garage or other area with limited ventilation.

Starting to Drive
Turn on the vehicle and start the engine to begin driving.

Before Starting the Engine
Check that the transmission is in Park (P), then press the brake pedal. Keep your foot firmly on the brake pedal when starting the engine.

Release the parking brake, if necessary (see page 111).

The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 m). When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defogger in order to reduce battery drain.

Changing the Power Mode
Use the ENGINE START/STOP button to cycle through power modes or start the engine.

Accessory or On mode: Press the ENGINE START/STOP button once without pressing the brake pedal for Accessory mode. Press it again for On mode.

Starting the engine: Press and hold the brake pedal, then press the ENGINE START/STOP button. Keep your foot firmly on the brake pedal when starting the engine.

Turning the vehicle off: Shift to Park (P), then press the ENGINE START/STOP button.
