**Adjusting the Front Seats**

Adjust the driver’s seat as far back as possible while allowing you to maintain full control of the vehicle. You should be able to sit upright and well back in the seat, adequately press the pedals without leaning forward, and grip the steering wheel comfortably. The passenger’s seat should be adjusted so that it is as far back from the front airbag in the dashboard as possible.

The National Highway Traffic Safety Administration and Transport Canada recommends that drivers allow at least 10 inches (25 cm) between the center of the steering wheel and the chest.

**Front Power Seat(s)**

* Not available on all models

*1 - If equipped
Front Manual Seat(s)*1

- **Height Adjustment**
  (Driver side only)
  Pull up or push down the lever to raise or lower the seat.

---

**WARNING**

Sitting too close to a front airbag can result in serious injury or death if the front airbags inflate.

Always sit as far back from the front airbags as possible while maintaining control of the vehicle.

*1 - If equipped
Adjusting the Rear Seats

Folding Down the Rear Seats

Separately fold down the left and right halves of the rear seat to make room for cargo.

To fold down the seat:

1. Store the center seat belt.
2. Insert the latch plate into the slot on the side of the anchor buckle.
3. Retract the seat belt into the holder on the ceiling.
4. Lower the center head restraint to its lowest position. Put the armrest back into the seat back.

5. Pull up on the seat back angle adjustment lever and fold down the seat-back.

To return the seat to the original position, pull up the seat-back in the upright position.
